

A torch is an important item. Everyone should have a torch in the car, and those who walk or cycle a lot should carry one with them anyway. The Mini-grip LED magnetic torch light is a great item that your customers, employees and suppliers will love. This torch consists of light-emitting diodes, commonly called simply LEDs, which have a high level of brightness. At just the right size, this spray rubber mini flashlight is slim and bright with 3 modes. The first mode a 4 LED flashlight, the second mode a 6 LED flashlight and the third mode is both on at once. Magnetic back for easy storage or for hands free use when attached to metal surfaces. Nylon carrying strap. Push power button. The flashlight requires AAA batteries included and inserted. Of which she uses exactly 2. The number of batteries used is included. A logo can be heavily used on items such as flashlights that tend to end up in handbags, jacket pockets or trouser pockets. Therefore, we recommend an indestructible laser engraving. As you can see, there are many different types of torches to suit all needs and budgets. Would you like to try the torches for yourself before ordering? Simply order an unprinted sample and see the quality for yourself.
