

Mug with a handle, made from high-quality ceramic and 5% recycled ceramic. The inside and outside are finished with a high-gloss finish. The bottom section of the mug is unglazed and shows the natural, unprocessed ceramic. Natural clay variations give this mug a unique character. Dishwasher-safe. Capacity 360 ml. NOTE: The white mug cannot be laser engraved because it is not sufficiently visible. Recycled ceramic mugs are manufactured by mixing raw materials with fragments of broken or unusable mugs collected in the same factory. These discarded components are finely ground into powder and then mixed with essential substances such as kaolin and quartz before being converted into new ceramic products. The final product usually consists of 5% to 10% recycled ceramics to ensure optimal quality. The use of recycled ceramics promotes the circular economy and reduces the need for new raw materials. This item is only available per 12 pcs to guarantee the item safety during transportation.
