

Power banks are an ideal gift to give away. Everyone has at least one phone that needs to be charged frequently. You use the 10.000 mAh MFi licensed powerbank more often than you might think, for instance during holidays, while on the road or when spending a day at the beach. The material of this power bank is aluminium, acrylonitril butadiene styrene (ABS), which is a guarantee for quality. Because it weighs 425 grams, you can count on a strong power bank! And the best part is, you can order them from 3 pieces! Furthermore, you can choose to have your logo printed on the power bank by laser engraving. This technique offers high quality and is long-lasting. When you print your logo on this power bank, you increase the visibility of your brand. And if you think that printing a power bank is expensive, IGO Promo proves otherwise. We can print power banks cheaply and promise outstanding quality.
