Height: 0.00 cm.

Flashlights with a logo are very popular as promotional gifts and are often used. You can't go wrong with the Aluminum flashlight LED. This torch consists of light-emitting diodes, commonly called simply LEDs, which have a high level of brightness. The flashlight requires Alkaline AAA, 3x. The number of batteries used is included. A logo can be heavily used on items such as flashlights that tend to end up in handbags, jacket pockets or trouser pockets. Therefore, we recommend an indestructible laser engraving. Have you found the perfect torch for your desires? Then we look forward to your order, but remember: the more you order, the lower the price. The torches are ideal for printing your logo, contact details or slogan. This is how your company is seen every day.
