Features

Minimum quantity: 300 Unit(s)

Material: silicon

Diameter: 4.50 cm.

Weight: 51.00 g.

Dishwasher proof No

Wristwatches are a rather unusual giveaway. But that makes them all the more popular with recipients. Not only smartwatches are popular, but also the conventional wristwatch. However, a wristwatch with your logo will certainly make your company memorable. The Watch Time Silicone Luminus is particularly popular because it allows you to make a good impression. This is an analog watch. Men's wristwatches are generally larger than women's wristwatches. The dial has a diameter of 43-45 mm. The built-in movement is one of Seiko PC 21. The frame of the watch is made of Silicone and the strap is made of Silicone. The wristband closes with a pin. A seconds scale is on the dial. This watch has a water resistance of 3 ATM. The international specification ATM corresponds to the UK specification bar. A watch with a water resistance of 3 ATM or 3 bar can withstand a test pressure of 3 bar for a limited time. This makes them insensitive to water splashes when washing hands or light rain. Don't have your logo wristwatches anymore? No worries! Reorders are very easy via the online account. Discover for yourself how easy it is to have your wristwatches refined.
