

Printed T-shirts are probably the most popular promotional item in the world. And with good reason, since they offer a number of great advantages. Are you going for the Avalite short sleeve unisex Aware™ recycled t-shirt? Then you have chosen a great shirt with many possibilities. When it comes to clothing, the material is crucial. This t-shirt is made of Single Jersey knit van 50% Recycled cotton en 50% Gerecycled polyester, 160 g/m2. Being made of cotton, the shirt feels comfortable and is durable. By the way, this shirt was made with an AWARE™ tracer. AWARE™ guarantees that genuine recycled fabric materials have been used and that the water reduction claims are correct. This is done through disruptive physical tracers and blockchain technology. So you're proven to save water and use real recycled fabrics when you choose an Impact item. 2% of the revenue from each Impact product sold are also donated to Water.org. The polyester used makes the shirt particularly light and comfortable. The self-fabric collar and narrow double needle stitching ensure durability while maintaining a polished look. The t-shirt incorporates Cyclo® recycled fibres where they use pre-sorted waste that determines the colour of the yarn. These fibres do not only reduce the demand for virgin resources but also exhibit a commitment to a circular life, embodying the essence of reducing waste and promoting a closed-loop system. This shirt is also available in plus sizes. These printed shirts could soon be arriving at your door - if you mix the different sizes, of course. With a printed t-shirt, your company will receive maximum attention.
