

The Clam Ace's sound is full-bodied with tight bass and clear highs. With this rich, balanced sound, every song sounds exactly the way it should. These over-ear headphones are equipped with Hybrid Active Noise Canceling, which uses both an outward-facing and an inward-facing microphone to block out ambient noise. Ambient Sound allows you to amplify environmental sounds to help you stay alert, a useful feature in traffic, at a cafe, or any other situation where you don't want to be completely cut off from the world. The Clam Ace has a volume wheel that allows you to easily adjust the volume while wearing the headphones. When making calls, the microphones focus on your voice, reducing ambient noise to create clear sound for the person on the other end of the line. Siri, or Google Assistant for Android, gives you hands-free control over your music and phone calls. With a playtime of 60 hours with ANC off and 50 hours with ANC in use, you'll almost never be without music. You can fully charge the headphones in 2 hours – and in just 10 minutes you can fast charge them and get 3 hours of use.
