You probably use the Nolan Recycle RPET backpack more often than you would think, like on holiday, a day out or to carry books and a laptop. The backpack is robust, water-repellent and has a reflective accent. Do you want to contribute to a better environment? You're making an eco-friendly choice with this backpack made of RPET. The backpack is manufactured using sustainable materials. The material of this bag is made of RPET, ensuring you will receive a quality bag that will last a long time. Weighing just 390 grams, you'll be carrying a strong bag on your shoulders. The backpack has a capacity of 20 L. The big advantage is that backpacks have an extra-large area to print your logo!
