

WoW! Grow your own flowers or herbs with this growing kit. This set consists of a water-resistant grow bag with a coconut earth block and a bag of seeds from flowers or herbs of your choice: basil, parsley, mint, sunflower, forget-me-not, and daisies. Simply add 300 ml of water to the pressed soil and 1 litre of garden compost is formed. This compost is then used to plant the seeds. Besides being fun to grow your own herbs or flowers, this gift contributes to maintaining a healthy bee population. Ideal to send as a letterbox gift. Includes a personalised full-colour cardboard sleeve. Made in Europe.
